Dear <merge persontitle surname>,

MABEL 2017
Medicine in Australia: Balancing Employment and Life

Thank you for participating in the MABEL survey. Almost 10,000 doctors participated in each of the first nine waves of the survey (from 2008 to 2016).

I am now inviting you to participate in Wave 10 (2017). A unique and powerful feature of the survey is its longitudinal design, so your continuing participation is vital to ensuring the ongoing quality and robustness of our analyses of enduring workforce policy issues. For further information about MABEL, please see the enclosed information sheet or visit our website www.mabel.org.au.

There are two ways to complete the survey:

- 1) Fill out the enclosed hardcopy survey and return it to the Melbourne Institute in the enclosed, postage-paid envelope, OR
- 2) Complete the survey online by logging in through our secure website www.mabel.org.au using the username and password below, **selecting** the survey relevant to your doctor status and following the simple instructions.

Username: <merge username> **Password:** <merge password>

Note that if you have recently changed your professional status (e.g. you are no longer in training but are now a specialist) and we have sent you the wrong version of the questionnaire, you can **select** the correct survey to do when you login.

If we sent you the incorrect survey type and you wish to do a paper version of the survey, please fax back the enclosed form and we will post the correct questionnaire to you, or contact our survey manager Anne Leahy by email (enquiries@mabel.org.au) or phone (03 8344 2600), **quoting your username id**.

If you have any queries please feel free to contact our survey manager.

I sincerely hope you will continue to participate in this major study by completing the MABEL survey. The research team looks forward to receiving your response. Thank you in anticipation. You can now follow us on LinkedIn, Twitter or Facebook to keep in touch with results.

Yours sincerely,

Professor Anthony Scott
Centre for Research Excellence in Medical Workforce Dynamics
