

Release 18 Data and Documentation Issues and Corrections

Material deprivation

The variables rmdhsm (Have a substantial meal at least once a day) and rmdhasm (Can't afford - Have a substantial meal at least once a day) are incorrect in the initial release. The raw variables mapped to rmdhsm and rmdhasm were not correctly updated from the last time the question on material deprivation was asked (in wave 14). This is now fixed.

CNEF files

The Cross-National Equivalence File (CNEF) variable D11105 “Relationship to Household Head” (only available in CNEF) is missing for 2003 in the initial release. This now included.

You will be able to access the updated files via the ADA Dataverse system.
