INTERVIEWER NOTE: *For each type of child care used, add together the weekly amount paid for each child. If care is free, record "0".*

If a school-aged child is in the same type of care as a child who is not yet at school, the total cost should be distributed between them. For example, if a respondent pays $40 to a sitter to mind a 3 y.o. and a 10 y.o. for 2 hours, the cost should be split among the children.
