Dear Dr. <merge surname>

MABEL
Medicine in Australia: Balancing Employment and Life

We recently invited you to take part in a landmark national longitudinal survey of doctors (MABEL) which is funded by the National Health and Medical Research Council (NHMRC), and conducted by the University of Melbourne and Monash University. If you have already completed the survey, thank you for your participation, and please disregard this follow-up letter.

If you are yet to complete the survey, we invite you once again to do so. The information you provide in the MABEL survey will be used for research into ways to:

- Improve your morale and work satisfaction, thus leading to improved patient care;
- Improve the population's access to medical services;
- Develop policies to help you manage your workload; and
- Improve the evidence base of medical workforce policy.

MABEL has been endorsed by the organisations and colleges listed overleaf, and a Policy Reference Group exists to ensure the survey is relevant and that results are implemented and will make a difference.

For more details, please read the enclosed information about MABEL. There are two ways that you can complete the survey:

- 1) Fill out the hardcopy survey we sent to you earlier and return it to the Melbourne Institute in the enclosed postage-paid envelope, OR
- 2) Complete the survey online by logging in through our secure website www.mabel.org.au using the userID and password below, OR

User ID: <merge username> **Password:** <merge password>

If you have changed your status (e.g. you are no longer in training but are now a specialist), or have misplaced the hard copy survey sent earlier, please fax back the enclosed form and we will post a new questionnaire to you. Or, you can contact our survey manager Anne Leahy by email (enquiries@mabel.org.au) or phone (03 8344 2600), quoting your username.

I sincerely hope you will participate in this major study by completing the MABEL survey. The research team looks forward to receiving your response. Thank you in anticipation.

Yours sincerely

Professor Anthony Scott
Melbourne Institute of Applied Economic and Social Research
